

Sample Document

English, Français, 한국어, 日本語

1. Heading 2 (1) 1. Heading 2 (2)

```
In [2]: print("Hello World!")
```

```
Hello World!
```

Heading 2 (1)

In Jupyter's code cells, you cannot specify tags, and they are always considered as `common` tags. Therefore, code cells apply to all languages.

Heading 2 (2)

When converting Jupyter, new markdown cells always operate and convert as if they start with `c`. However, in a Health Check, because all markdown cells are concatenated and inspected, the last the previous markdown cell is applied.
